LETTER FROM THE DIRECTOR

FGCU Academy Needs Your Support Today to Ensure that Our Critical Mission of Senior Education and Enrichment Continues!

FGCU Academy is ready to serve the SWFL community for the 2023 Season—Learning, Growing, Sharing, Socializing. I am excited to welcome you this year to the new FGCU Naples Center, which is located at 704 Goodlette-Frank Rd N, Suite 330 in Naples. Also, we have two new locations in Lee County, Pelican Landing in Bonita Springs and the FGCU Kleist Center on main campus. As always, both locations are open to all our students.

If we have had the opportunity to meet in person or if you have heard me speak, I hope I was able to share with you my passion about FGCU Academy and its mission to provide lifelong learning and enrichment to the SWFL community. I believe it is critical to our well being to keep exploring new avenues for growth to keep our minds engaged in our past, present and future. I know those who join as members and friends who participate share my commitment. Thank you for supporting our vital programming.

As an educator, I find myself slightly uncomfortable talking about the financial needs of FGCU Academy beyond thanking everyone for their support. But, this year and moving forward, it is important that I find the words to ask for additional support through philanthropic donations. The fact is that the revenue generated through memberships and fees provides for only 50% of our annual operating costs. Additionally, our attendance has not yet reached pre-pandemic levels, so our revenue is much lower than in the past.

Our passion keeps us moving forward and your donations will do the same. Please take a few minutes to consider donating to ensure our continued success. All amounts make a difference in strengthening the work we do in the community.

Your gift will allow the Academy to offer more than 1,500 diverse and fascinating programs at more than fifteen locations throughout SWFL. Please visit our website (hyperlink to website) to review the rich and varied programmatic offerings that are available this year. Through our mission we promise to enrich the lives, minds and social well-being of more than 10,000 SWFL adults and seniors during our 2023 season.

I am grateful for your consideration to support this vital community outreach program this year.

I look forward to seeing you at a FGCU Academy program soon. Please contact me directly at jguerra@fgcu.edu or 239-434-4838 with questions or to learn more.

In gratitude,
John J. Guerra
Director of FGCU Academy

Berlin's Museum Island \$25 / \$30
January 10 at 2:30 – 4pm, Tuesday
GO5115 – Moorings Park Grey Oaks (Naples)
Speaker: Carol Jonson

Berlin, Germany, is a city of wonders, but one of its true treasures is Museum Island. Five museums situated on this island in the Spree River in the heart of Berlin cover more than 6,000 years of history. Just a few highlights are the iconic bust of Nefertiti in the Neues Museum; the Pergamon Museum's incredible architectural installations of the Hellenistic Altar of Pergamon along with the Ishtar Gate from Ancient Babylon. The Altes Museum's collections include treasures from the worlds of Ancient Greece and Rome, while the painting and sculpture collections in the Alte Nationalgalerie and the Bode Museum span some of the greatest eras in Western art.

Artemisia Gentileschi: Female Genius of Baroque Painting \$25 / \$30
January 17 at 2:30 – 4pm, Tuesday
AR5116 – Arlington (Southeast Naples)
Speaker: James Pagliaro

In 2020, for the first time, the London National Gallery dedicated a major exhibition to a female artist. The accomplished Baroque painter Artemisia Gentileschi was described by BBC News as "... the Beyoncé of art history." Also referred to as the "Queen Bee of Female Empowerment" by the pundits, this genius of the Baroque Era is finally getting the attention and acclaim her vast talents warrant. Join us as we explore the tumultuous life and greatest works of one of the most accomplished 17th century artists, who was producing prodigious paintings by the age of 15 and was the first woman to become a member of the prestigious Academy of Design in Florence.

People around the world have been deeply touched by the recent passing of the British Monarch Queen Elizabeth II. The image of the late Queen is reported to be one of the most photographed, most painted likenesses in the history of the world. Her profile is on over 29 billion British coins, countless stamps and banknotes. Her portrait has been painted over 135 times by some of the world's most renowned artists. She has been photographed repeatedly by the world's greatest photographers, from Cecil Beaton in the 1940's to Annie Leibovitz in 2007. Join us as we examine the

changing visual images and artistic depictions of this great British monarch, from her childhood years throughout the course of her long 70-year reign, culminating in tributes for her Platinum Jubilee.

Vanished! The Stories Behind Some of History's Greatest Art Heists \$25 / \$30
January 26 at 4 – 5:30pm, Thursday
GR5121 – Grey Oaks Country Club (Naples)
Speaker: Carol Jonson

How did the iconic Egyptian bust of Nefertiti end up in Berlin's Neues Museum and the Parthenon's beautiful Elgin Marbles in the British Museum? Where was Leonardo da Vinci's Mona Lisa stashed when she went missing from the Louvre for two years? Will the eerily empty frames hanging on the walls of the Isabella Stewart Gardner Museum in Boston ever have their priceless paintings recovered and reinstalled? These are just a few of the mysteries you will hear answered in this intrigue-filled lecture on History's Greatest Art Heists.

Art of the 19th Century French Salon and the Rebellion that Became Known as the Impressionist Movement \$25 / \$30
January 27 at 1:30 – 3pm, Friday
GL5122 – Moorings Park Grande Lake (Naples)
Speaker: James Pagliaro

Most people love the work of the 19th century French Impressionists. Ever wonder why Impressionism took the art world by storm? Ever stop and think about the unique painting techniques, color theories and subject matter that separated the Impressionists from their artistic predecessors? Want to understand more about the impact that Impressionism had on Western Art History? Gentileschi who worked throughout Italy and England; Elisabetta Sirani who painted brilliantly but died mysteriously at the age of 27; and Rosalba Carriera who was famous for her pastel portraits in the 18th century.

The painters Claude Monet and Paul Cezanne are often broadly grouped within the pantheon of geniuses included in the Impressionist Movement. While both painted at roughly the same time in France, Monet's fresh color palette and unique brushstrokes are quite distinguishable from the planes of color and complex, geometric forms Cezanne employed. This lecture explains the significance of the Impressionist Movement and then examines and compares several of the iconic works by both artists. Monet's unique use of color, weather and light are illustrated by some of his most memorable works. While Cezanne's movement to more abstract geometric forms demonstrates why so many artists called him the "Father of Modern Art."

King George III \$25 / \$30

March 22 at 10 - 11:30am, Wednesday

NC5195 - Naples Center (Naples)

OL5196 - Online via Zoom

Speaker: Nancy Maxwell

To many Americans, he is Mad King George, the tyrannical English king whose despotic ways pushed the colonists to revolution. To the English, he was Farmer George, a stubborn, plodding ruler who obstructed his parliament and blocked progress. Both assessments are incomplete, and his unfortunate mental collapse was a family tragedy. There was much more to the life of this very civilized, cultured and moral man.

Queen Elizabeth I - Gloriana \$25 / \$30

March 31 at 10 - 11:30am, Friday

BR5197 - Brooks Commons Club (Bonita Springs)

Speaker: Nancy Maxwell

Where would England be today had Elizabeth I not become queen? A lesser ruler might have succumbed to the conflicting demands of political factions. A lesser personality might have indulged personal whims at the cost of ministerial respect. Against great odds - her father ordered her mother's execution; she had no husband; she produced no heir; and her cousin plotted her assassination. Elizabeth nevertheless tackled religious strife, political divisions, court intrigue and war, to guide England to a state of unity and prosperity.

King Edward VIII relinquished the English throne and left his country to marry Wallis Simpson, an American divorcee. Forbidden to enter England, they spent their lives in exile. May 23 at 2:30 - 4pm, Tuesday
AR5207 - Arlington (Southeast Naples)
Speaker: Nancy Maxwell

Remembered for his unusual ways, extravagant castles, and passionate support of Wagner, Ludwig II in fact reigned over a tumultuous era in Bavaria, as the country, independent for hundreds of years, was caught in the power struggle between Austria and Prussia. His desultory interest in government coupled with the unscrupulous ambitions of family members was a recipe for disaster and contributed to Ludwig's abrupt downfall and mysterious death. Was the king truly insane or a victim of intrigue? This lecture looks at the circumstances and events surrounding the life and death of Ludwig II.

Speaker: Michael Taylor

The American-born photographer and painter Man Ray (1890-1976) was one of the leading participants of both Dada and Surrealism, and the only American artist to play a prominent role in the launching of these two influential movements. This lecture focuses on the portraits that the artist made during his first period in Paris, between 1921 and 1939, when the outbreak of World War II forced him to return to the U.S. Although Man Ray worked in a variety of media over the next two decades, including objects, films and paintings, photography would be his primary means of artistic expression in Paris. This lecture explores the artist's portraits of such cultural luminaries as Ernest Hemingway, James Joyce, Erik Satie and Gertrude Stein, who, like Man Ray, belonged to the "lost generation" in Paris between the wars.

Neel was an unshakably original artist who avoided avant-garde art movements in favor of creating a figurative tradition that attended to the imperfections, vulnerabilities and psychological states of the human body. Her penetrating portraits feature the colorful individuals surrounding her - pregnant women in the '60s, working-class friends and neighbors, the New York elite - even when those subjects were considered taboo by a male dominated art establishment in New York City.

In the era before photography, it was the role of the court artist to convey visual "news" both to and from the monarchs. It was a tricky road to tread for such messengers! How to portray Anne of Cleves, a prospective bride or Sir Thomas More, a foe of the king? What if the monarch didn't like what he saw? What if he did, but the reality was different? What if the monarch was the impulsive and vengeful Henry VIII? But fate and his mother had other plans for George, and at the age of 54 he sailed, none too willingly, for England. The English were not particularly glad to see George arrive, either. Sixty-three years later the Presidential campaign of 1960 remains of continuing interest. Voters had to choose between the experience of Nixon and the potential of Kennedy. Would the people choose to "get the country moving again" or hope to continue the "peace and prosperity" of the 1950s? The personalities were large, the politics were raw, the stakes were high and the result was a cliffhanger. It doesn't get any more exciting than this.

During World Wars I/II, several Native American languages were used as communication tools among U.S. command officers. In WWII, the U.S. Marines recruited a group of Navajo Indians to create a code whose function was to make communication on the battlefield faster and more efficient. Thus was born the "Navajo Code Talkers." To quote U.S. Marine Major Howard Connor: "Were it not for the Navajos, the Marines would never have taken Iwo Jima." This lecture discusses the critical use of coding as a tool for communication in war time, what made Native American languages so effective, and why the Navajo code was the only war time code that was never cracked.

AR5441 - Arlington (Southeast Naples)

Speaker: Nancy Maxwell

A visitor to Italy today travels freely through the magnificent cities of Florence, Naples, Rome and Venice; but it was not always so easy. Italy is a relatively new country, and the fabled cities may indeed be regarded as prizes, because they did not all join Italy willingly! It took a combination of the wily statesman Camillo Cavour, the political activism of the secret revolutionary Giuseppe Mazzini, and the romantic nationalism of Giuseppe Garibaldi - none of whom wanted to work together - to draw disparate "Italians" together. And even that wasn't quite enough. Napoleon III and Bismarck had something to add. This lecture looks at the remarkable personalities and events that led to the emergence of a unified Italy in 1871.

As Roman forces withdrew in the early 5th century, new peoples entered Britain to clash with the disunited Celtic majority. A series of pagan Anglo-Saxon invaders established regional kingdoms and gradually converted to Christianity. In the 11th century, Norman conquerors began a process of political consolidation that would set the island kingdom apart from its continental neighbors. The principle and practice of representative government, the adoption and spread of "common law," and the power of the Roman Catholic church as illustrated in the great Romanesque and Gothic cathedrals are topics of this lecture

PL5583 - Pelican Landing (Bonita Springs)
Speaker: Dr. Charles Kupchella

This lecture examines the root causes of the Civil War and its less-than-settled outcomes. We also examine how it was that America failed to resolve pre-Civil War issues peaceably, and, how our first Civil War set up some of today's most divisive issues. America's "democratic" republic was, and still is, designed to protect citizens from rapid change and from the tyranny of big groups and large states. We consider the question: could this design have led, and still lead, to the tranny of minorities and small states, eventually yielding explosively pent-up demands for change? Come ready to consider the question: Could we have another Civil War?

- **Option #2 - February 24 at 1:30 - 3pm, Friday**
GL5478 - Moorings Park Grande Lake (Naples)

Speaker: Dr. Lubomyr Yaroslav Luciuk

Based on a recently declassified KGB document, this lecture explores how Soviet operatives planted "fake news" stories in North American newspapers in order to provoke discord between the Jewish and Ukrainian diasporas. We discuss alleged Nazi and Soviet war criminals living in North America and a selection of documents demonstrating how official inquiries into this matter just after the war, and more recently, concluded that claims made about "thousands" of Nazis hiding in Canada and the U.S. were "grossly exaggerated." Regrettably, the latter message did not undo a false Soviet narrative that continues to be regurgitated by agents of the Russian Federation and their fellow travelers to this day, a successful stratagem for distracting attention from Russia's ongoing war against Ukraine.

The "south side" of Immokalee was originally the Black side, and, other than a few labor camps, was the only place where Black people were allowed to live. Main Street was all White, and Blacks were only allowed to cross Main Street in order to work and purchase shoes. Jim Crow laws, pervasive after Abraham Lincoln was assassinated, separated all aspects of Immokalee's jobs, schools, sports, and living places. After the Civil Rights Act was passed and schools were required to desegregate, White parents had meetings to discuss how their children would deal with the influx of Black students. The story of this town's complex racial history is the subject of this lecture.

The word "socialism" was hijacked and corrupted by Marx and Lenin and became a dirty word. By itself, stripped of its historical associations with bad things such as totalitarianism, state-ownership of the means of production and communism - socialism is a positive word; it means simply, inclined toward being with and caring about others. By virtue of its nearly 90 federal social welfare programs costing over a trillion dollars annually, the U.S. is and has been a "socialist" country for a hundred years. This presentation includes a review of how the U.S. compares to other "socialist" countries of the world.

The Creation of Germany \$25 / \$30

March 27 at 1:30 - 3pm, Monday

PL5508 - Pelican Landing (Bonita Springs)

Speaker: Nancy Maxwell

Perhaps because of its dominant role in two world wars, it is easy to think of Germany as an old nation with a long history. But Germany is a young state, less than 150 years old. The original territory was divided into myriad small holdings ruled by independent noble families and surrounded by the powerful states of Austria and France. The path to unification would be blocked by all of these. Despite earlier attempts, it took the rise of Otto von Bismarck, with his cunning, wisdom and political acuity, to overcome all these obstacles and establish the German Empire.

What Happened to the Parties of Lincoln and FDR? \$25 / \$30

April 3 at 10 - 11:30am, Monday

MP5510 - Moorings Park Original Campus (Central Naples)

Speaker: Dr. Charles Kupchella

The Republican Party has changed dramatically and would no doubt be unrecognizable to conservative stalwarts such as Lincoln, Teddy Roosevelt and Eisenhower - and certainly to Liz Chaney. Despite Chaney's unquestionable conservative values and record, she was voted out of the party, making what was once a party of values appear to have become a hollow personality cult framed by one big lie and lots of smaller ones. What happened? And what about a Democratic Party allowing itself to be identified with such extreme nonsense as defunding the police and giving people free stuff. Does either party have a substantive core? Are we stuck with a two party system - and, if so, are we stuck with these two? Perhaps it's time to bring back the Whigs?

Churchill created a special intelligence agency to set occupied Europe "ablaze" using "ungentlemanly" tactics. His inspiration came, in part, from the Irish Republican Army which waged a guerilla campaign against British rule. The Civil Wars of France \$25 / \$30

April 24 at 10 - 11:30am, Monday

MP5531 - Moorings Park Original Campus (Central Naples)

Speaker: Nancy Maxwell

Ruling over a fractious state is a challenge at the best of times, but when the "new religion" reached 16th century France, the combination of ambition, greed and faith made for a lethal cocktail. The great noble families fought for dominance over each other and the weak kings; the royal family, buffeted by intrigue, plots, and counterplots, struggled to hold onto their lives, let alone their thrones. By 1589, the ruling house of Valois had collapsed and the Bourbons reigned. This lecture explores the personalities, intrigue and machinations of the French wars of religion, as well as the values and beliefs that enabled moderation to ultimately prevail.

The Crusades were a series of military expeditions initiated by the Popes for the purpose of protecting and expanding

Christendom. They were undertaken primarily to the Middle East, but also to Spain, southern France, and Baltic Europe, and lasted from 1095 CE, when Pope Urban II preached the First Crusade to recover Jerusalem from the Muslims, until around 1500, when the last Muslims were expelled from Spain and all of the Baltic area was effectively Christianized. This lecture focuses on the background, tactics, and battles of the First and Third Crusades and offers a profile of the Military Orders, particularly the Knights Templar, who played a key role in Crusader warfare and administration.

This lecture explores the case and FBI failures.

We all love to travel and capturing those once-in-a-lifetime moments to share with friends and family, or for personal memories, is part of the experience. Our photographs need to bring the sensations of sight, sound and smell back to trigger our memories and to communicate how we felt to others. To do this, we need to think and feel, as much as look, when setting out to take photographs. Travel photography expresses the feeling of a time and place, portrays a land, its people, or a culture in its natural state and has no geographical limitations. Learn how to create images that are only seen in magazines.

RELIGION, FAITH & PHILOSOPHY

The Need for Another Enlightenment \$25 / \$30

January 12 at 10 - 11:30am, Thursday
BV5581 - Bentley Village (North Naples)
Speaker: Dr. Charles Kupchella

During the "Age of Enlightenment," an 18th-century movement emphasizing reason, critical appraisal and skepticism, civilized society began to value the search for truth rather than unsubstantiated declarations. Truth emerged as something able to survive rational consideration and critical appraisal. Unfortunately, the illumination didn't reach everywhere and even where it did, the enlightenment never rose above "dim." Ignorance, poverty, backward-culture as well as religious dogma and political ideology retarded the Enlightenment's advance and even caused it to fade. We need another, higher-wattage, Enlightenment today!

Truth or Consequences: "Truthiness" in the Post-Truth Era \$25 / \$30

January 24 at 2:30 - 4pm, Tuesday
AR5582 - Arlington (Southeast Naples)
Speaker: Dr. Charles Kupchella

What is truth, really? Is there such a thing as absolute truth? How did this become the so-called post-truth era? What is truthiness? A common misconception about the role science plays in elucidating truth is that it is a catalog of facts and laws. However, science is actually a way of getting at the truth by establishing theories which, while useful as working truths, are always subject to testing and reappraisal.

In 2007, Time magazine asserted that the Bible "has done more to shape literature, history, entertainment and culture than any book ever written." It's a bold claim, but one that's hard to refute. But if the Bible's standing as a cultural behemoth is beyond doubt, its history is anything but. For centuries, some of the world's greatest thinkers have puzzled over the origins and evolution of this remarkable document. Who wrote it? When? And why? These are the thorniest of questions, made all the more tangled by the Bible's great age. Join us as we explore the origins of the bible as we know it today.

February 28 at 2:30 - 4pm, Tuesday
GO5588 - Moorings Park Grey Oaks (Naples)
Speaker: Dr. Charles Kupchella

There has been a rise in both anti-science sentiment and anti-intellectualism in America. How did this happen? Is this a consequence of today's politicization of truth, derived from

"anti" issues about masks, climate or vaccines? Did this come from conflicts between science and religion, e.g., creationism vs. evolution? Could it be traced all the way back to the Enlightenment giving way to Romanticism and other "isms? What are the implications for our country if science is no longer used as a guide to government policies? What are the consequences of diminishing support for science and education as drivers of our economy?

Among humanists he was given the sobriquet "Prince of the Humanists," and has been called "the crowning glory of the Christian humanists." Using humanist techniques for working on texts, he prepared important new Latin and Greek editions of the New Testament, which raised questions that would be influential in the Protestant Reformation and Catholic Counter-Reformation.

Located on the Mid-Atlantic ridge, the nation is unique in so many ways. From its more than two hundred volcanoes to its early history told by sagas, this island of less than 400,000 people has much to offer. Geothermal energy is the source of much of the nation's electricity so that aluminum smelting is most economic. Trips to the many spas and hot springs offer a refreshing break year around. Next, we work on query letters and proposals for traditional publishers/agents, what to send and how to pitch. Finally, we look at the steps for self-publishing, including what to expect, how to find the best fit and pricing levels.
